EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with W. Daniel Swayze, Jr. (Reg. 34,478) on September 15, 2004.

The application has been amended as follows: Amend claims 2, 3, 9 and 10 as below:

Claim 2 (currently amended): An improved electrical apparatus and a substrate configured for resistance to atmospheric effects; the apparatus including at least one electrical device and a package structure ~~comprising an electrically-insulating component~~, said package structure substantially enclosing said at least one electrical device; the improvement comprising: involving a corrosion-resisting agent ~~with said electrically-insulating component~~ of said package structure,

wherein said electrical apparatus is affixed with a said substrate included in an electrical product and wherein said substrate is embodied in a chemical compound material; said involving being effected by subsuming said corrosion-resisting agent as an element of said compound material.

Claim 3 (currently amended): An improved electrical apparatus and a substrate configured for resistance to atmospheric effects; the apparatus including at least one electrical device and a package structure ~~comprising an electrically-insulating component~~, said package structure substantially enclosing said at least one electrical device; the improvement comprising: involving a corrosion-resisting agent ~~with said electrically-insulating component~~ of said package structure,

wherein said electrical apparatus is affixed with a said substrate included in an electrical product and wherein said substrate is embodied in a chemical mixture material; said involving being effected by subsuming said corrosion-resisting agent as a component of said mixture material.

Claim 9 (currently amended): An electrical apparatus and a substrate having resistance to atmospheric effects; the apparatus comprising at least one electrical device and a packaging structure ~~comprising an electrically-insulating component~~; said packaging structure substantially enclosing said at least one electrical device; said electrically insulating component of said packaging structure including a corrosion-resisting agent,

wherein said electrical apparatus is affixed with a said substrate included in an electrical product and wherein said substrate is embodied in a chemical compound material; said including being effected by subsuming said corrosion-resisting agent as an element of said compound material.

Claim 10 (currently amended): An electrical apparatus and a substrate having resistance to atmospheric effects; the apparatus comprising at least one electrical device and a packaging structure ~~comprising an electrically-insulating component~~; said packaging structure substantially enclosing said at least one

electrical device; ~~said electrically-insulating component of said packaging structure~~ including a corrosion-resisting agent,

wherein said electrical apparatus is affixed with a said substrate included in an electrical product and wherein said substrate is embodied in a chemical mixture material; said including being effected by subsuming said corrosion-resisting agent as a component of said mixture material.
